

Romanized Ukrainian place names for the guests of UEFA Euro 2012

Ukraine as one of the host countries of European soccer championship Euro 2012 makes all the necessary preparations for the reception of fans and tourists, including creation of call-centers and standardization of street names on name boards. The state Service of Geodesy, Cartography and Cadastre supplied Kyiv City Council with its recommendations concerning Romanization of street names and pointed out typical mistakes. The recommendations also included rendering of such terms as “street”, “square”, “lane”, etc. The SSPE *Kartographia* published a series of maps and atlases in English with the place names Romanized in accordance with the approved Table of Transliteration.
